# IN THE UNITED STATES PATENT AND TRADEMARK OFFICE PATENT APPLICATION

Applicants:	Daniel Baumgartner et al.	Attorney Docket:	8932-1191-999
Application No.:	10/553,495	Confirmation No.:	3694
Int'l Appln. No.:	PCT/CH03/00247	I.A. Filing Date:	April 14, 2003
For:	INTERVERTEBRAL IMPLANT		

New York, New York 10017 August 31, 2006

Hon. Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

# SUBMISSION OF ENGLISH TRANSLATION OF INTERNATIONAL PRELIMINARY EXAMINATION REPORT

Sir:

Applicants hereby submit an English translation of the PCT International Preliminary Examination Report in connection with the above-identified international application, which was filed in the U.S. Designated/Elected Office under 35 U.S.C. § 371.

No fee is believed due in connection with this submission. However, if for any reason a fee is due, please charge that fee to Deposit Account No. 50-3013. A duplicate copy of this Submission is enclosed.

Respectfully submitted,

Garry J. Tuma' (Reg. No. 40,210)

Attorney for Applicants

JONES DAY Customer No. 51832 222 East 41st Street New York, New York 10017 (212) 326-3939 10/553,495

Reference is made to the following document:

D1: EP-A-0 346 129 (UNIV NEW JERSEY MED; UNIV RUTGERS (US); JOHNSON & JOHNSON ORTHOPAE) 13 December 1989 (1989-12-13).

#### Claim 1

(positive opinion)

Document D1 is considered to be the closest prior art for the subject matter of claim 1.

D1 discloses (the references in parentheses are to D1):

an intervertebral implant provided with a central axis, comprising

- a) a lower and an upper cover plate (8, 10), and
- b) a central part (2) which is located between the cover plates and is provided with a sleeve (4) that surrounds a fibre system;
- c) the fibre system is connected to the cover plates (column 10, line 60 to column 11, line 16), and
- d) the fibre system is wound around the central part along the cylindrical outer surface (column 4, lines 51 to 53), and
- e) the sleeve surrounds the periphery of the central part
- (2) (figures 1 to 3) and is made of a homogeneous elastomer

Porm PCT/IPEA/409 (Box V) (January 1994)

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/CH 03/00217

(column 4, lines 53 to 55)) which is criss-crossed by the fibre system.

The subject matter of the claim differs therefore from the prior art in that

- d) the fibre system is guided over the outer surfaces of the two cover plates and at least partially surrounds the central part and the two cover plates; and
- e) the sleeve surrounds the central part (2) peripherally (figures 1 to 3) and is made of a homogeneous elastomer (column 4, lines 53 to 55)) which is criss-crossed by the fibre system.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem addressed by the present invention can therefore be considered that of improving the torsional rigidity and the fixation of the intervertebral implant.

This is achieved in the present invention in that the fibre system is better able to absorb a tensile load and at the same time forms a structure on the outer surface of the cover plates.

The solution to this problem as proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)), because the corresponding features are neither disclosed nor suggested in the available prior art.

#### Claims 2-33

Claims 2-33 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.
